OUR SUSTAINABILITY GOALS

Nearly half of the species we carry are certified sustainable or part of a Fishery Improvement Project (FIP). We are currently involved in 7 different FIPs globally. Two we helped launch with the Mexican Octopus and the Brazilian Caribbean Red Snapper. **Our ultimate goal is to have 90% of our products certified or in a FIP by 2025.**

Wild Caught

NETUNO is known for its high-quality Snappers. Our Snapper sources are selected first and foremost for quality and consistency. We also focus on sourcing from fisheries that are in a Fishery Improvement Project when possible, or we work to put one in place, such as the Northern Brazil Snapper FIP that we launched in 2014.

Our goal is to continue to offer the same high-quality Snappers that you have come to expect from NETUNO at volume levels without sacrificing our quality or sustainability standards. This is why we also invested in our own Snapper fleet in Brazil. Our small fiberglass boats are easily maneuvered, making it ideal for trap collection with minimal disruption to the ocean environment. Our traps are specially designed to allow smaller fish to escape and continue to grow and breed, fulfilling our FIP promise to make Snapper more sustainable.

NETUNO sources warm water lobster from a variety of carefully selected suppliers and all follow our strict quality standards. No matter the origin, we work together with our suppliers to ensure consistency across the entire supply chain. From the catch and processing to the packaging and delivery, you can be assured that our lobster is the highest grade and quality, regardless of origin.

All **NETUNO** Lobsters are:

- Sodium tripolyphosphate free
Never “soaked” or “glazed” for weight
- Passed through metal detectors
- Carefully processed and inspected under the strictest quality assurance standards
- Certified sustainable or part of a Fishery Improvement Project (FIP) or FIP pre-assessment

It's not the origin, it's **NETUNO**
